PERFECT DESIGNING HUB

08 Years of Services Excellence Contribution Leadership

Company PROFILE

PERPECT Designing Hub has over 10+ profes- sionals having multi-disciplinary experience who can undertake most complex designs and complicated project implementation.

We believe that providing consultan- cy services is always a team work comprising of multi-disciplinary experts and expertise. In this regard we have developed good teams headed by capable managers to lead the team.

Our Team Perfect includes committed pro- fessionals with rich experience in the chosen filed and determined to mark a difference.

Started in 2018, at Bhilai, we have served more than 30 clients and complet- ed over 50 plus projects.

PERFECT Designing Hub is an ISO CERTIFIED COMPA- NY for its Quality Management System.

Why **CHOOSE US**

When there are choices of choosing consultants from multinationals to large companies, why to choose a Small-size company Perfect Designing Hub? The answer is simple. In large companies, the personal attention required for the project and clients' requirements is always an issue. Also because of over- crowded projects quality delivery and value addition takes second place many times. The founder of Perfect Designing Hub has worked for multistate before starting Perfect Designing Hub and have well understood these disadvantages and is committed to always exceed customer satisfaction.

Vision

Build World-Class, Mega Organization which makes significant contribution to the Society.

Mission

Based on innovative products and services that make a difference and excellence of its business operations.

By providing the best quality and vast range of professional services with minimal cost and on-time completion.

Continual improvement in quality and cost through innovative technology and effective utilization of resources.

By exceeding customer satisfaction.

Complete Survey & Report
Helping you with value engineering Survey & reports.

Feasibility, Preliminary, Detailed Project Reports
Best engineering practice, confirm to design standards & at least cost.

Pre-Tender Advisory
Helping you with value engineering & cost cutting.

Project Management, work Supervision, Quality checks
Assuring the Asset built with right quality & on time.

WHAT WE DO

Perfect Designing Hub is an ISO 9001-2008 Certified Compa- ny offering comprehensive engineering consultan- cy service across core areas of practice. Our service covers all stages of project ranging from surveys

CHP AND CONVEYORS

INDUSTRILS EQUIPMENTS

BUILDING AND STRUCTURES

URBAN INFRASTRUCTURE

PAVEMENT MANAGEMENT

PROJECT MANAGEMENT

SERVICES

CHP AND CONVEYORS

Building good CHP and Conveyors Plant involves huge investments and require considerable time for implementation. As the user expectations become higher and higher every day to have better and Safe therefore, engineers need innovations in saving construction costs, construction time and reduce maintenance costs.

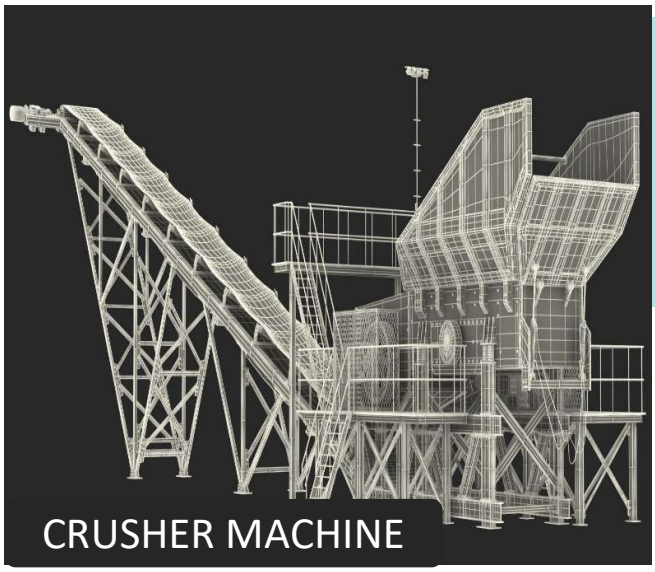
Perfect Designing Hub understands this better and works towards achieving these goals on all our projects. Our expertise in CHP and Conveyors spans the entire project life cycle, from the feasibility stage through to the construction stage, as well as the development of rehabilitation, pavement management and maintenance programs.

Our Services include

- Alignment Studies
- Concept and Feasibility Studies
- Engineering studies, Surveys and Investigations
- Detailed Motor & Gearbox / Design
- Junction and Interchange Design
- Required Crusher.
- CHP & Conveyors Design
- Value engineering
- Bill of Quantities and Project Cost estimation
- Construction Supervision and Contract administration
- Pavement Maintenance Management
- Conveyors Safety Alert
- Project Management and advisory services

EQUIPMENTS

Perfect Designing Hub proudly acclaims to provide the best services and can undertake the responsibility to design, execute and manage the whole Equipment's. PDH is committed to building long-term relationships based on integrity, performance, value, and client satisfaction. We will continue to meet the changing needs of our clients with our quality services delivered by the most qualified people.



Projects

MS CHIMNEY (Ø1400 & 30 MTR.

SELF LOCKING SCAPE BUCKET

MS CONVEYORS BRACKET WITH ROLLER

RECEDIND STOPER FOR UNIVERSAL RAIL MILL

BUILDING & STRUCTURES

more

Structural building for industrials

Structural Gallery for conveyor

Individual House design 3D

Construction of 3 BHK House

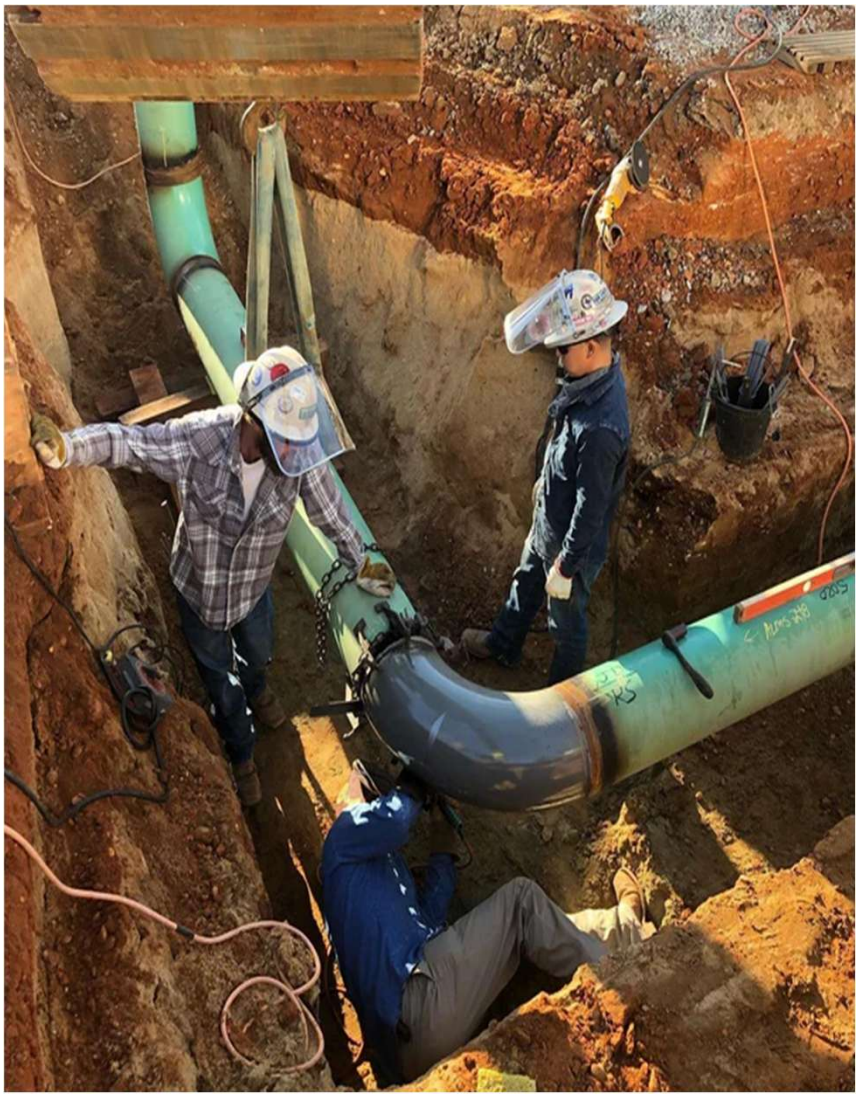
Construction of Industrial budlings

Construction of 3 BHK Housing units

PIPELINE LAYING & TRENCHLESS Solutions

We can lay any type of Pipeline beneath any surface features from Rivers, Runways, Railways, Roads & Buildings using Trenchless Crossing methodology ensuring minimal disruption to the environment & minimum disruption to above ground surfaces.

We have established very good reputation to undertake projects related to "Petroleum & Gas Pipe Line laying" for "City Gas distribution" & for Intra-city & Inter-city Piped CNG/LNG transportation, Water/Jal Board & Sewer Pipe Line laying.



OUR SERVICES

- Onsite MS Elbow and MS-T Fabrication
- Fit-up and Welding of MS Pipe
- Excavation and Back Filling
- Welding test and Hydro test before completion

URBAN INFRASTRUCTURE

As more people move to towns and cities, need for living spaces is increasing. Need of the day is good living places with state-of-the-art infrastructure facilities. Quick construction, least cost and no maintenance is the need of the day but without compromising on aesthetics and quality. We provide most cost-effective solutions with the use of latest technology and usage of local materials. We provide infrastructure design services for layouts, townships, SEZ's, villa projects and community living places.

Our Services include

- Site grading/earthworks
- Industrials building and Structure design
- Water supply network
- Sewerage network
- Water tanks/reservoirs
- Storm drainage
- Electrical and Plumber works
- Project management and Construction supervision

PAVEMENT MANAGEMENT

Pavement is the costliest component in road system, also, pavement starts deteriorating from day one of construction. Thus, pavement Maintenance plays a significant role in overall maintenance of road network for the agency. Understanding the behavior of the pavement over a life cycle period is very important in dealing with pavement management.

Our expertise includes selecting the most appropriate works program to maximise the long-term performance of the road network under a range of user-defined funding and treatment strategies, integration of HDM-4 with Road Information Systems (RIS) or Geographical Information Systems (GIS). Our services ensure that agencyâ€™s meet current challenges and forecasting for future demands.

Our Services include

- Pavement condition data collection
- Pavement condition evaluation
- Life cycle cost analysis (LCCA)
- HDM-4 model setup and economic analysis
- Integration of HDM-4 with RIS
- Selection of optimal pavement treatment
- Forecasting future pavement needs
- Prioritization of road sections for maintenance

PROJECT MANAGEMENT

Effective project management and construction supervision is a key aspect in completing the project successfully. Transferring designs and drawings to reality, finding solutions to filed problems, construction planning, executing with high precession and completing within the stipulated time is the essence of construction supervision and project management. Perfect Designing Hub Project management team enables clients to focus on their core business, with the assurance that their project goals will be suc- cessfully take care. We ensure that a qualified and dedicated team of professionals is assembled to suit the specific project needs. We then provide a focal point for the client, ensuring clear communication, overall quality control and simplified project administration.

Our Services include

- Cost Estimates
- Tendering and Contract Drawings
- Construction supervision and Contract Administration
- Cost Control and Scheduling
- Contract Administration
- Work Supervision
- Quality Control and Quality Assurance
- Budgetary Control
- Progress Reporting
- 3rd party inspections and reporting

BOT/DBFO/PPP PROJECTS

Value Engineering

Value Engineering is basically application of knowledge and experience in optimizing project components design to achieve overall savings in costs and time without compromising the durability and safety. Value engineering will be undertaken on an already prepared designs and estimates to make it optimal and implementation friendly to meet the project specific demands.

Pre tender advisory services

With more and more investments in roads sector are coming from private companies on PPP mode, there is need for assessing the investment viability of each project before submitting bids. We, at Infra support help clients by conducting quick but comprehensive filed studies and desk studies on each project and assess its viability to bid. Our services include traffic validation studies, tollable traffic estimation, engineering assessment surveys, preparation of BoQ and estimation, financial modeling and viability reports.

Concessionaires Engineer or owners Engineers

Concessionaire or owners of the project in a PPP project requires design, advisory and supervision services from consultants in order to complete the project successfully. We provide re-engineering services which involve redesign of the facilities to meet the project construction requirements and to save cost and time.

ROAD CONDITION SURVEYS

Pavement is the costliest component in road system, also, either to design a new pavement or to maintain/rehabilitate, a host of studies and investigations are required to be carried out. Further, pavement starts deteriorating from day one of construction, to understand the rate of deterioration, to recommend improvement measures.
Our expertise includes undertaking the road condition surveys using the best of equipmentâ€™s and procedures for a thorough investigations, analysis.

- Traffic surveys using videography
- Rut measurements
- Subgrade testing
- Other necessary studies and investi gations

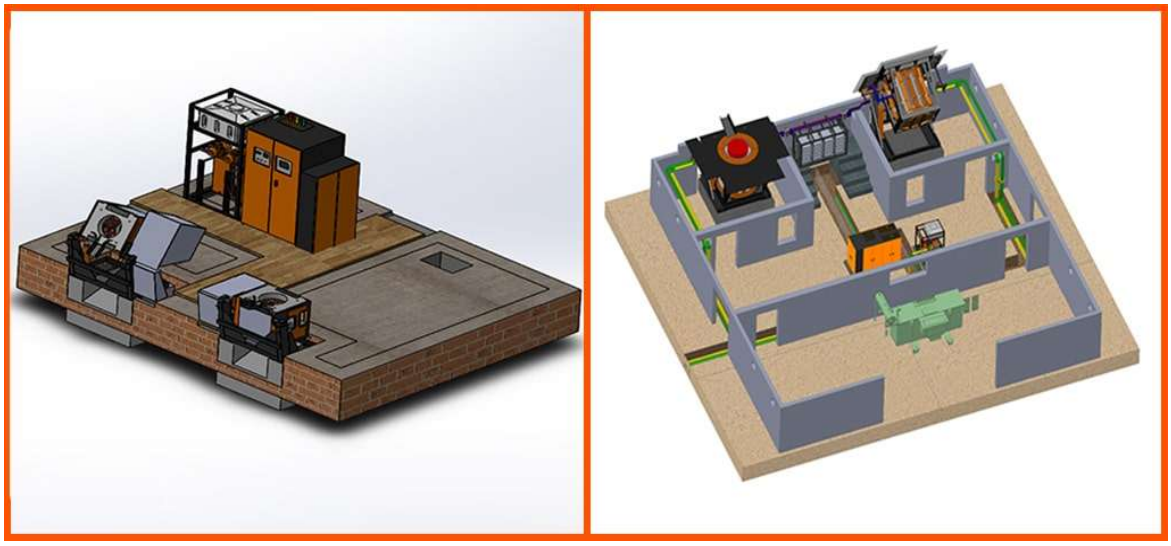
- Pavement condition data collection
- Pavement composition survey
- Axle load surveys
- Deflection study using Falling weight Deflectometer (FWD)

Project Management Consultancy (PMC) Services For Flue Gas Desulfurization (FGD) Project, Phase-I Works Under DB Power Plant Champa in the state of Chhattisgarh.

Client: GALAXY INFRA, TUNA, DB POWER

Preparation of Feasibility Report cum Detailed Project Report (DPR) and Completion report for Induction Furnace project, Under Balco Plant Korba in the state of Chhattisgarh.

Client: SKE, VAAMAN, VEDANTA



Feasibility Study, Detailed Project Report, Survey and Preparation of Land Plan for Industrial Steel Structural Shed for Neutralization pit Shed, in under Bhilai steel Plant (BSP), Durg in the state of Chhattisgarh.

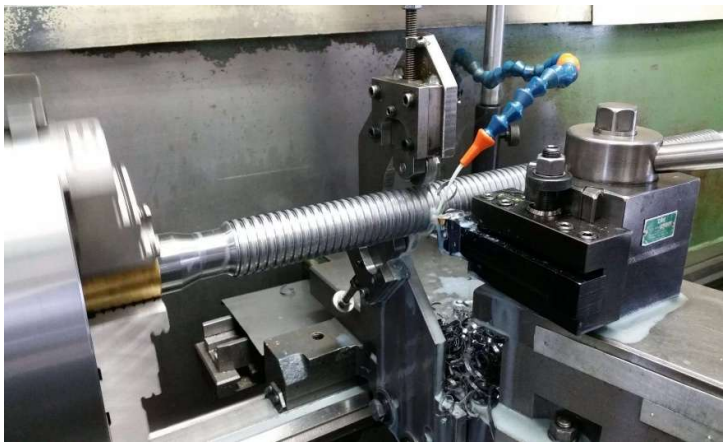
Client: RAMKY, SAIL

Feasibility Study, Detailed Project Report, Survey and Preparation of Land Plan of PREE ENGINEERING BUILDING for CRS Infra Projects In Vaodara in the State of Gujrat.

Client: CRS INFRA PROJECTS

EQUIPMENT PROJECT

As a modern high-tech enterprise, we specialize in the research, development, production, and environmental protection Engineering equipment, as well as supporting equipment for belt conveyors and other Industrials Equipment's.



OUR SUPPLY EQUIPMETS

- **TANK & PRESSURE VASSEL**
- **RECEDING STOPPER FOR URM**
- **FOUNDATION BOLT**
- **ROLLERS & ROLLER BRACKET**
- **LOOK TAKE-UP TROLEY**
- **CRUSHERS MACHINE**
- **INSPECTION DOOR**
- **SCRAPE BUCKET**
- **LOADER BUCKET FOR JCB**
- **LADERS**
- **ROLLER TABLE FOR MILL**
- **CERCULAR & RECTANGULAR DUCT**
- **CHIMNEY**
- **MACHINERY WORKS & ETC.**

OUR CLIENT'S & PARTNERS

AND THEIR MANY COMPANY MID-SCALE & SMALL-SCALE COMPANY OUR CLIENTS AND PAETNERS.

CRUSHER REVAMPING WORK

Feasibility Study, Detailed Project Report, Survey and Preparation of structure, machinery and Motors with Required details Drawings for the revamping work of Slag Crusher Plant for Jindal plant angul, in the state of Odisha.

Client: KEW, Angul Jindal plant

Complete cleaning with required Fabrication & erection support Steel structure and platform work.

Repairing & replace Screen & Motors with alignment.

And other Minor works.

CASE STUDIES

Perfect Designing Hub has over 10 trained and experienced professionals having multi-disciplinary experience who can undertake most complex designs and complicated project implementation.

Started in 2018, at Bhilai, we have served more than 30 clients and completed over 50 projects.

Perfect Designing Hub is an ISO CERTIFIED COMPANY for its Quality Management System.

Perfect Designing Hub also has a well-equipped fully functioning Material Testing Laboratory locat- ed in Bangalore, the Lab is in the process of NABL Accreditation (Quality Management Systems ISO/IEC 17025:2017)

QUALITY POLICY

We are committed to exceed customer satisfaction by continually improving in processes and services through implementation of innovative technologies to ensure they consistently meet customer requirements on time and within budget.

SISTER COMPANY (PERFECT SOLUTION)

It was started as sole ".proprietorship business. Our expert team of professionals always assist our clients to select cost effective best architectural solutions according to their needs.
Company has attained prominence as a leader in the field of excavation & provided rental based Earth moving Machines and Construction work through competence, competitiveness and timely delivery with highest quality standards and recognized safety performance.
With the advancement of science and technology, we, in the construction and engineering industry strive for innovation and enhanced efficiency through the state-of-the art technologies and techniques.

OUR SERVICES:

- Complete Excavation work with Transporting leads.
- All types of Earthmoving Machines and Transportation vehicle rental based.
- Complete Maintenance & Repairs work.
- All types of Buildings works & road works.

SISTER COMPANY (PERFECT SOLUTION)

MACHINES:

- JCB EXCAVATOR MACHINE & BREAKERS
- JCB LOADER
- JCB-3DX/4DX
- GRADERS
- HYWA
